請依下文回答第 44 題至第 46 題。

A great deal of gender-role socialization takes place in the home. Fathers engage in 44 “rough-housing” play with their sons than with their daughters, even in infancy. As children grow, boys and girls are encouraged to play with different types of toys. 45 gender differences are found in toy preferences. In general, boys have less flexibility to play with “feminine” toys than girls 46 with “masculine” toys. Many studies have demonstrated the influence of gender-role socialization.

| 45 | (A) Permissive | (B) Impossible | (C) Submissive | (D) Substantial |
| 46 | (A) do | (B) are | (C) have | (D) can |

請依下文回答第 47 題至第 50 題。

With cloning technology now available, we will need to consider if cloning is ethically acceptable. For example, is there any way to prevent the abuses of cloning without blocking beneficial medical and scientific progress? Human cloning research could bring about substantial health benefits, including the creation of animals with human-compatible organs for transplantation. Cloning could also be used to help scientists understand how genes are turned on and off, which could provide important information about the causes of cancer and the mechanism of aging.

Another issue is the use of cloning to treat infertility. Reproductive technology, once considered controversial, is now accepted by the public. Why not allow a woman who is unable to conceive naturally to clone a child by placing her own DNA inside of a donor egg?

Yet, what about our sense of identity and ancestry? Imagine giving birth to a clone of yourself—or your mother, father, or grandfather. Familial relationships could become increasingly complex. How can we prevent sinister applications of cloning, such as the creation of clones that would serve as slaves or a source of body parts? What effect will cloning have on theology? Is each human life unique? Would a clone have a soul? Finally, what will happen to clones that are failed experiments? Will they be disposed of like other experiments that have gone awry? These are just some of the issues that should be considered before a national policy on cloning is formulated.

- 47 What does the word “controversial” mean?
- | | | | |
|----------------|----------------|---------------|------------------|
| (A) Disputable | (B) Manageable | (C) Plausible | (D) Conventional |
|----------------|----------------|---------------|------------------|
- 48 Which of the following statements is NOT an advantage of human cloning mentioned in this passage?
- (A) Human cloning can help scientists understand how genes work.
- (B) Human cloning can help improve organ transplantation.
- (C) Human cloning can help scientists find out how human beings get old.
- (D) Human cloning can bring dead people back to life.
- 49 According to this passage, which of the following is NOT a possible problem caused by human cloning?
- (A) Failed human clones may be thrown away.
- (B) Relationships among family members may be confusing.
- (C) Infertility will be very common.
- (D) Human clones may be used as a source of body parts.
- 50 Which of the following statements best states the main idea of the passage?
- (A) Human cloning research can improve reproductive technology and thus help infertile couples have kids.
- (B) With so many possible ethical problems, we should think twice before setting up a national policy on cloning.
- (C) The way to prevent the abuses of cloning may hinder beneficial medical and scientific progress.
- (D) Human cloning research should be stopped because it is not ethically acceptable.
